Sol-M™ Blunt Fill Needles are used for draw-up of medication, re-constitution of medication and accessing IV Bags.

Sol-M™ Blunt Fill Needle with filter features a 5 micron filter membrane that is designed to prevent larger particles being drawn into the syringe when preparing medications from ampules.

Features & Benefits

- 45° bevel to help reduce accidental needlesticks
- 18G for ease in draw-up of medications
- 5 micron filter - Effective filtration of glass particles
- Available individually or pre-attached to 3ml, 5ml and 10ml syringes
